

OPHTHALMIC ROUND BOTTLE

A complete family of ophthalmic bottles ideal for liquid solutions

A standard range of Ophthalmic Round Bottles, along with a nozzle, ideal for lens solutions or eye droppers.

Simple assembly

This is a complete pack solution when used with the Tamper Evident Jaysafe closure that fits over the nozzle, offering a simple assembly, with a press in nozzle and screw on closure.

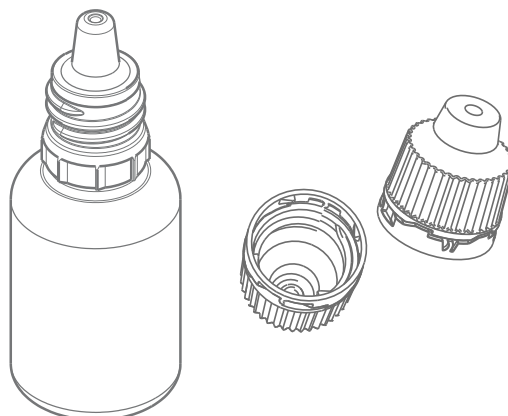

Wide range of sizes and colours

The containers are available in a wide range of sizes from 10ml to 550ml and made from HDPE that may be recycled. This round bottle design has a maximised label area, simplifying the labelling process and gives it a strong visual identity.

Packs can also be manufactured in a range of colours.

Ophthalmic Round Bottle:

- Complete pack solution. Container, nozzle and closure manufactured by Nolato Jaycare
- A large range of pack sizes utilising the Jaysafe Closure
- Has strong visual identity
- Blow moulded Container using either the EBM or IBM process
- Injection moulded Closure and Nozzle to maintain precise dimensional tolerances and product quality
- The single piece Jaysafe closure offers Tamper Evidence via a drop band
- Available in Pharma or Food grade materials
- Containers and closures available in a range of colours
